SUMMARY

MCA graduate skilled in software development, cloud services, and data handling. Strong ability to analyze requirements, design solutions, write clean code, and collaborate in team environments. Looking for an entry-level role where I can contribute to building and improving technology solutions while continuously upskilling in modern tools and frameworks.

INTERSHIPS & FREELANCING

Individual Contributor, Outlier AI | Freelancer Oct 2024 - May 2025

- Reviewed and improved 1,000+ prompt–response pairs for LLM training.
- Conducted data annotation and evaluation improving model output consistency.
- Collaborated with global teams maintaining quality and accuracy standards.

Data Science Intern, CodeClause | Internship Nov 2023 - Dec 2023

- Developed logistic regression models and enhanced accuracy via hyperparameter tuning.
- Performed EDA, data cleaning, visualization, and ML models (logistic regression, tuning) using Python.

EDUCATION

Masters of Computer Application May - 2024

Kalinga Institute of Industrial Technology(KIIT), Bhubaneswar

- Relevant Coursework:** Cloud Computing, DBMS, Software Engineering

Bachelors of Computer Application Sept - 2022

Trident Academy of Creative Technology(TACT), Bhubaneswar

- Key Subjects:** Programming in C, Web Development, Computer Networks

PROJECTS

Online Crime Management System (Group Project)

- Built login, crime reporting, and admin dashboard using HTML, CSS, JS & SQL.
- Designed role-based authentication and CRUD workflows.
- Collaborated using GitHub and performed unit testing for key modules.
- Improved interface usability and optimized SQL queries for faster retrieval.

CERTIFICATIONS

- AWS Academy Cloud Foundation** – AWS Academy | June 2023 | [view credential](#)
 - Learned core AWS services (EC2, S3, IAM) and cloud deployment basics.
- Career Essentials in Data Analysis by Microsoft and LinkedIn** | June 2025 | [view credential](#)
 - Gained knowledge in data cleaning, visualization, and basic analytics.

SKILLS & ABILITIES

- Languages:** Python, SQL, HTML, CSS, JavaScript
- Tools/Technologies:** AWS (EC2, S3, IAM), Azure basics, Git/GitHub, Docker concepts
- Data Skills:** Pandas, NumPy, EDA, ML basics (Logistic Regression, Tuning)
- AI/LLM:** RLHF, SFT, Data Labeling, Prompt Evaluation
- Soft Skills:** Problem-solving, analytical reasoning, communication, adaptability, teamwork
